**ADDENDUM #2**

**TENDER FOR GREENSTONE ASPHALT PROJECTS**  
**MUNICIPALITY OF GREENSTONE**

**PAGE 1 OF 6**

MAY 4, 2018

Responses for questions 10 of 10 as posed:

Question 1.

Are there maps available with the project streets highlighted?

Answer 1.

No. Maps of the communities are posted on the Tenders/RFPs webpage, however roads are not highlighted. The roads list in TABLE 1. is subject to change.

Question 2.

Does work starting or concluding at an intersection include the intersection itself or does paving start/end beside the intersection?

Answer 2.

For the purpose of bidding, paving does not include the intersection unless paving is continuous after the intersection.

For example, in the community of Beardmore, Audrey Street and Ross Street are listed as roads to be paved. Where Audrey Street intersects Walker Street, the intersection is NOT to be included in the cost estimate. Where Ross Street intersects Heron Street, Pearl Street and Audrey Street, the intersections ARE to be included in the cost estimate.

**PAGE 2 OF 6**

Question 3.

Where is the disposal area located?

Answer 3.

There are Public Works Headquarters in each community, each with lay down yards within 1 km of the Public Works garage. Material generated from work in a community will be disposed of in the same community.

Question 4.

Do you have a number of catchbasins/manholes in each area available?

Answer 4.

In response to this question, the Municipality requests a per/unit price for catchbasin/manhole repairs as a Provisional Item.

**Bidders are required to use the amended Tender Form included in Addendum #2.**

Question 5.

What are the existing asphalt depths?

Answer 5.

The existing asphalt depth is 50 mm throughout.

Question 6.

Will there be any airport flight control while we work?

Answer 6.

Paving is confined to the Airport apron. No work on the runway is required. Airport staff will provide all necessary air traffic communication.

Question 7.

Is the 800m paving in the airport in 1 continuous straight line?

Answer 7.

There are multiple strip patches in relatively straight lines at the R. Elmer Ruddick Nakina Airport that total 800 m<sup>2</sup>.

Question 8.

Will additional A gravel be required for the airport? If so how much?

Answer 8.

The Municipality will provide A gravel for the work at the airport locations, if required.

Question 9.

Is bonding required?

Answer 9.

Bonding is not a requirement of the Tender Bid.

Question 10.

If we conduct a site visit, are we required to check in anywhere?

Answer 10.

Contract Estimators are required to contact Brian Aaltonen, Director of Public Services (Cell: 807-854-8529) prior to a site visit. In regards to site visits specific to the airports, in addition to contacting Brian, the Airports Manager (Pat
