

# Lake Nipigon Shoreline Trail

## Viewing Platform

Two viewing platforms are located high atop the lake offering an amazing view of the area and a Bald Eagle's nest. The walk up the steep hill is the most difficult section of the trail.

## Lake Nipigon

Lake Nipigon is one of the largest fresh water lakes in Canada. World renowned for its Speckled Trout and Lake Trout fishing, the lake also has a healthy population of Northern Pike, Walleye, and White Fish.

## Beach Access

The trail travels along the shore of Lake Nipigon and during low water periods you may choose to walk the beach for a section of the trail.

The fine sand will tempt you to remove your shoes and walk barefoot on the beach.

## Poplar Lodge Park

This fully serviced municipal campground is located on the beautiful shores of Lake Nipigon. The park offers excellent swimming, a long sandy beach, children's playground and access to 8kms (5 miles) of hiking trails.

## High Hill Harbour

High Hill Harbour has boat launching and camping facilities. Small craft warnings are common on Lake Nipigon and those that venture onto the lake should be aware that conditions can change rapidly.

## Fire

During the spring of 1999, a large forest fire engulfed some of the area the trail travels through. Interpretive signs along the trail provide insight into the fire and the new forest which is now naturally regenerating. The trail has an abundance of blueberries growing along it.
